JAMES CAMERON
**CHALLENGING
THE DEEP**

“The ocean is an alien world right here on earth that is as rich and exotic as anything that I could imagine myself.”

James Cameron

Exhibition for Hire

Challenging the Deep is a major immersive exhibition that traces filmmaker James Cameron's lifelong pursuit of and achievements in deep-ocean science, technology and exploration, including his record breaking dives in *DEEPSEA CHALLENGER*.

This exhibition takes visitors into an underwater environment using cinema scale projections, artefacts and equipment used in Cameron's expeditions. Discover the shipwrecks of *Titanic* and the German battleship *Bismarck*. Contains artefacts from the design and construction of the *DEEPSEA CHALLENGER*. Includes original film props and costumes from *The Abyss* and *Titanic*, including the iconic Heart of the Ocean diamond.

Exhibition content

- 95 objects
- 15 multimedia experiences
- Video microscope interactive
- DSC sit-in pilot sphere (mock-up)
- *Titanic*, *DSC* and *Bismarck* touchscreen interactives
- Object labels, theme and subtheme panels (English)
- Includes all instructions, hardware and software, IP for reproduction of graphics

Audience

- Families
- Children over 12 years old
- STEM students
- Visitors interested in design, technology, science, maritime archaeology and film.
